**General Technical requirement For RC Holders :**

Inspection and testing :

(A) Manufacturers shall have the following facilities :

1. Suitable software to test hardware components such as motherboard and its components like chip set, DNA controller, memory controller, input/output controller and availability of bad sectors on hard disk drives. It should also be possible to check serial, parallel & USB ports using special loop back connectors. Software such as Ziff Davis Bench, Win Bench & QA plus should also be available for checking the keyboard and for bench marking other software components.
2. Software pattern generator to generate patterns to check the monitors of different characteristic .
3. Facility to measure leakage current and resistance to earth for checking the safety aspect of the system and peripherals.

(B) Manufacturers shall also preferably have the following facilities :

1. An ESD simulator of 8 KV to check ESD susceptibility
2. Thermal chamber to check suitability for each configuration for the ambient condition of 0-45 degree C. These tests could alternatively be conducted at a Govt. laboratory if the facilities for the same are not available with the supplier.

(C) Drop test should be conducted on all the six surfaces of the packaging with the systems &amp; peripherals packed inside by dropping the same from a height of 1 m.

Performance of the hardware shall be checked after conducting such tests with the help of diagnostic software. The packaging should be able to withstand the test without any damage or malfunction.

(D) The tests at (B)&amp;(C) above should be conducted on at least one piece out of every 100 pcs manufactured and supplied in each configuration during each inspection.

(E) Certifications required as per the specifications shall be checked/verified from source/website etc.

(F) Supplier shall furnish the details regarding the maximum power consumption of the whole machine/system and data of maximum power consumption of the following components individually.

- a. Chipset
- b. Processor
- c. Monitor
- d. Hard Disk Drive
- e. Cooling Fan
- f. Power Management Unit
